# Install the Auctria Bidding App

Auctria App

Auctria Mobile Bidding app turns a phone into a bidding device. It allows you to easily make purchases, place bids, and receive notifications.

- Bidders get notified in real-time if they are outbid, not having to keep checking emails.

- By scanning QR codes in the mobile bidding app, bidders can quickly and easily gain access to your event, sign in with their credentials or navigate to a particular item within the event.
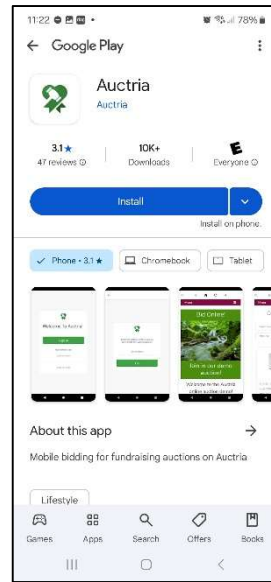

The Auctria app is available from the App Store and Play Store.

OR you can scan the QR Code below to install the app for your mobile device.
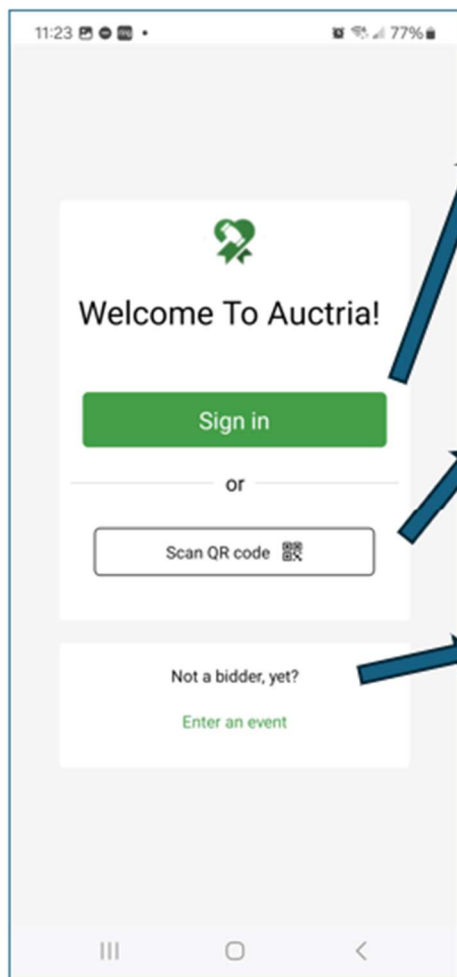

Install the Auctria Bidding App

Ready to install app on mobile device

Welcome To Auctria screen

Sign in if you previously installed the app

OR

Scan *Event website QR code*
